

Announcing video's future, Today: Praetorian's 3D Total Awareness

L-3 Praetorian's Turnkey Surveillance Solution

See All of Your Video on Just One Screen, in Full 3D Context

Video Flashlight™

- **NEW** – See multiple stitched camera views on one screen in 3D context
- Real-time 3D immersive display of the surveillance environment
- Easy-to-use technology with intuitive user interface
- Common visual understanding between command center and mobile use

Camera Placement Tool

- **NEW** – Color-coded identification differentiates fixed, Pan-Tilt-Zoom, and infrared cameras
- Enables validation of the number and type of cameras required for comprehensive surveillance coverage
- Reduces labor and material costs when planning and installing video surveillance
- Can be used on new projects as well as retrofitting facilities that have existing CCTV systems

VisionAlert™

- **NEW** – Increased number of streams per server
- Patented algorithms permit the screening of environmental conditions reducing false alarms
- Capable of programming multiple alarms per camera

Hawk™

- **NEW** – E-mail and text messages reporting for high priority alarms
- Multiple or single site surveillance, and command and control
- Open and scalable architecture integrates with many radar, sensor, and video technologies

That “future” technology—immersive video exploitation—leaps a full generation beyond constrained legacy 2D systems, giving you fly-through awareness while maximizing your surveillance ROI.

Only Praetorian brings you the combination of innovative, patented, proven, and open-architecture 3D surveillance solutions, that set the excellence benchmark for video's future... **today.**

Designed to be the exact solution to outdated conventional CCTV systems that overwhelm operators with “soda-straw” camera feeds displayed on large banks of video monitors, Praetorian radically strengthens users...with **powerful simplicity.**

Features

Praetorian's 3D common operating picture via Video Flashlight™, its ability to integrate and organize both video analytics and non-video sensors via VisionAlert™ and Hawk™, its ability to virtually optimize camera coverage via Camera Placement Tool, and its applicability across new surveillance purposes all combine for a cost-effective package that has no technology match globally.

Test Praetorian's Peerless 3D Total Awareness Strength. Experience the Future of Next-Generation Surveillance, Now.

Benefits to You

Praetorian's breakthrough technology exploits video and sensory information in 3D context, an approach that is the best means of capturing:

- ***What is Happening.*** It delivers the benefit of never-blinking vigilance and real-time, 3D situational awareness via immersion in "The Big Picture." ***You See More with Praetorian's 3D Total Awareness.***
- ***Why it is Occurring.*** A continuous visual timeline of what occurred before and during the alarming event, and an instant-involvement into what is happening right now, real-time. ***You Understand Better with Praetorian's 3D Total Awareness.***
- ***How to Intervene, in Fast-Moving, Complex Situations.*** Your ability to see more and understand better results in the unmatched power of appropriately and quickly responding—both at the command and control desk and in the field via remote access with PDAs and laptops. ***You Can Act Quickly and Confidently with Praetorian's 3D Total Awareness.***

Praetorian Advantages

Praetorian's *open-architecture* transforms both legacy and new systems into assets that are value-added, long-term, obsolescence-resistant, and flexible. You benefit from:

- ***Total Situational Awareness:*** A *preemptive*, active response capability, and fast post-incident analysis.
- ***Easy, Seamless, Immersive 3D Event Tracking of Complex Events:*** Across a spectrum of nearly countless cameras, whether live or replayed video.
- ***Video Maximization/ROI Power:*** Beyond just *security* functions, to *also* include *safety, training, operations, business, and entertainment applications*...more utility means a higher ROI for your organization.
